He has practiced at all levels of the system, including the United States Supreme Court. He has represented private businesses and been legal counsel for local economic development agencies in the public sector. He has been trained as a mediator, concentrating in resolution of disputes related to technology and the computer industry.**

**He was president of The Entrepreneur Society, and a co-founder of the Bluegrass Inventors Guild. He served on the Board of Directors of KNITE (Kentucky Network of Information Technology Enterprises) until it merged with the Advanced Technology Council (ATC) and has served on the Board of the new Technology Network of the Greater Louisville Region (TeN), as well as on the Board of The Venture Club of Louisville.**

**He has lectured on subjects including formation of businesses, entrepreneurship, business litigation, and the use of limited liability companies as a business strategy and an estate planning technique. He has also presented series of seminars to industry groups and the Kentucky Bar Association on year 2000 problems, as well as on e-commerce and technology issues for lawyers. He has taught an adult education course for the Jefferson County Public Schools on "Entrepreneuring" and starting a small business.**

**He has contributed to a number of publications, including the Courier Journal and TechRepublic. He has also written a monthly column for Louisville Computer News on legal issues related to the computer industry and is writing a book, which is being concurrently published online and in print, on how to start an E-commerce business.**

**A major area of his practice involves representation of entrepreneurs and small to medium sized businesses, which are embarking on or engaged in issues relating to electronic commerce.**
